DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by (1) Wenstrom, Jr., (2) Hildwein, et al., (3) Wellner, et al., (4) Termanian, or (4) Bedi, et al. The referenced patents disclose a body including an interface and a cannula, the cannula extending into and terminating in the vessel; the body for at least partial insertion into the bodily tissue at a point of insertion; the interface being the portion of the body which remains in contact with the bodily tissue adjacent the point of insertion while the device remains inserted in the bodily tissue; the interface having an exterior surface including texture thereon.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8, 11-18, and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hildwein, et al., in view of Hildebrandt, Hunt et al., Bedi et al., Ternamian, Wenstrom, Jr., Ciaglia et al., Hunt et al., Ju, O'Connor et al.

Art Unit: 3763

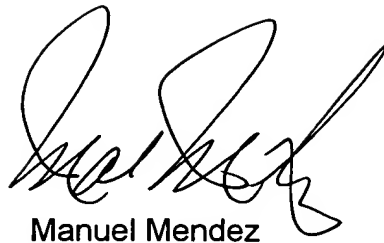

The Hildwein, et al. Patent discloses a body including an interface and a cannula, the cannula extending into and terminating in the vessel; the body for at least partial insertion into the bodily tissue at a point of insertion; the interface being the portion of the body which remains in contact with the bodily tissue adjacent the point of insertion while the device remains inserted in the bodily tissue; the interface having an exterior surface including texture thereon. The Hildwein, et al. Patent does not expressly disclose texture comprising of rounded bumps, pointed bumps, and static texture. However, the use of texture comprising rounded bumps, pointed bumps, and static texture is conventional as demonstrated in the teachings and figures of (1) Hildebrandt, (2) Hunt et al., (3) Bedi et al., (4) Ternamian, (5) Wenstrom, Jr., (6) Ciaglia et al., (7) Hunt et al., (8) Ju, and (9) O'Connor et al. Accordingly, it would have been obvious to modify the cannula structure of the Hildwein, et al. Patent, to include the texture enhancements disclosed by the applicant. Conclusively, the use of texture comprising rounded bumps, pointed bumps, and static texture, should be considered an obvious design alternative.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.
